Създаването на атрактивна учебна среда е ключов подход за превръщането на училището в желана територия. Тя може да бъде както в класната стая, така и в цялото училище

# Типове дейности за превръщане на училището в атрактивна среда

- Персонализиране на класната стая – поставяне на неща, свързани с/ направени от самите ученици - създава чувство на “собственост” у учениците, което допълнително стимулира тяхната мотивация и ангажираност към учебния процес (удачен метод и за повишаване на съпричастността на родителите към училището)
- разчупване на традиционната класна стая и превръщането ѝ в място, където децата се чувстват “у дома”, място, което има дава възможност те сами да предложат идеи, творчество и фантазия.
